

WHO IS ELIGIBLE FOR PROJECT LIFESAVER?

In order to be eligible for the program, the participant must:

- Be living with a cognitive impairment such as Alzheimer's, dementia, autism, or another condition that may place them at risk of wandering
- Be monitored by a caregiver
- Reside with a caregiver or in the non-secure section of a facility
- Reside in York Region
- Not be involved in unescorted activities that would increase the risk of wandering
- Not operate a motor vehicle

PROJECT LIFESAVER

WHAT IS PROJECT LIFESAVER?

The York Regional Police Project Lifesaver program combines radio technology with a co-ordinated police response to locate wandering and disoriented loved ones due to Alzheimer's, autism or other conditions or disorders.

To learn more about the program or to apply for Project Lifesaver, visit yrp.ca/ProjectLifesaver.

Project Lifesaver allows York Regional Police to efficiently locate disoriented and wandering people, so they can be reunited with their caregivers.

HOW DOES PROJECT LIFESAVER WORK?

Project Lifesaver participants wear a wristband that emits a tracking signal. The wristband is a one-ounce, battery-operated transmitter that emits an FM radio signal every second, 24 hours a day. These products are supplied directly by Project Lifesaver International.

When caregivers notify York Regional Police their loved one is missing, a Search and Rescue team responds to the area where the person was last seen and utilizes a specialized mobile-location tracking system.
